

FEBRUARY/FÉVRIER

ARTICLES

Slobodan P. Simonovic Knowledge-based systems and operational hydrology	1
J. C. Jofriet, S. Jiang, and S. W. Tang Finite element prediction of temperature gradients in walls of cylindrical concrete storage structures	12
Walid M. Abdelwahab Transferability of intercity disaggregate mode choice models in Canada	20
J. L. Gordon Hydroelectric turbine setting — a rational approach	27
Donald H. Burn, Henry D. Venema, and Slobodan P. Simonovic Risk-based performance criteria for real-time reservoir operation	36
Richard L. Powley and Bradley H. Haid Flow through gated conduits at partial and full gate openings	43
K. J. Kennedy, E. Andras, C. M. Elliott, and B. Methven Effect of a chelating agent (DTPA) on anaerobic wastewater treatment in an upflow sludge blanket filter	53
A. R. Perks, I. S. McLaurin, K. D. Harvey, J. H. Wedel, B. N. Johnson, and L. A. Warner Hydrometric data collection and interpretation in the prairie provinces and Northwest Territories	58
F. F. Saccomanno and S. M. El-Hage Establishing derailment profiles by position for corridor shipments of dangerous goods	67
N. Rajaratnam, C. Katopodis, and S. Lodewyk Hydraulics of culvert fishways IV: spoiler baffle culvert fishways	76
Chris Zeiss and James Atwater Waste disposal facilities and community response: tracing pathways from facility impacts to community attitude	83
M. Z. Cohn and Z. Lounis Moment redistribution in structural concrete codes	97
Glenn Morris and Husam Omar Analysis of laterally loaded flat-plate structures	109
Murray C. Temple and Kenneth Hon-Wa Mok Starred angles supporting secondary trusses	118
W. K. Tso and T. J. Zhu Implications of the 1988 Saguenay earthquake on Canadian seismic strength specification	130
A. Ghobarah and T. Ramadan Seismic analysis of links of various lengths in eccentrically braced frames	140
Mysore G. Satish, Yiping Guo, and Matiur Rahman Computation of uniform flow in open channels with flood plains	149

NOTE

Damei Li and Willi H. Hager Correction coefficients for uniform channel flow	156

APRIL/AVRIL

ARTICLES

M. S. Troitsky, Z. A. Zielinski, and N. F. Rabbani Prestressing force increment of two-span steel girder	163
S. K. Malhotra and A. P. Sukumar Reliability-based design of mechanically connected built-up wood columns	171
L. W. Gold Brittle to ductile transition during indentation of ice	182
John Morrall Cross-section elements to accommodate passing lanes and vehicle storage during avalanche control for the Trans-Canada Highway in Rogers Pass	191
Tomasz T. Pietraszek and George Oommen Static and dynamic behaviours of an 85-year-old steel railway bridge	201
Alejandro Guerrero Acosta, Guy Leclerc et Michel Tremblay Évaluation des règles d'exploitation de systèmes de réservoirs	214
Daniel Caissie and Nassir El-Jabi A stochastic study of floods in Canada: frequency analysis and regionalization	225
J. G. Henry, D. Prasad, and W. B. Lohaza Fate of indicator organisms in sludge during bacterial leaching of metals	237
R. Kerry Rowe Contaminant impact assessment and the contaminating lifespan of landfills	244

Ronald D. Townsend, Vinod K. Garga, and David Hansen	Finite difference modelling of the variation in piezometric head within a rockfill embankment	254
Taufik Elouali, Jules Houde, et René Tinawi	Effet des murs de remplissage en maçonnerie sur la période de vibration des portiques	264
Peter G. Buckland and Brian D. Morgenstern	Conversion of a suspension bridge into a cable-stayed bridge	273
B. Fournier et Marc-André Bérubé	Évaluation du potentiel de réactivité alcaline des granulats à béton produits dans les Basses-Terres du Saint-Laurent du Québec (Canada)	282
Han Ping Hong and Niels C. Lind	Proof load test levels by exact integration	297
D. P. J. Duchesne and J. L. Humar	Engineering software — a structural consultant's perspective	303
Baidar Bakht and Leslie G. Jaeger	Load sharing factors in timber bridge design	312
Murray A. Fitch and Edward A. McBean	Multi-day flow forecasting using the Kalman filter	320

NOTES

Daniel Caissie and Nassir El-Jabi	A stochastic study of floods in Canada: truncation level by region	328
P. F. Doyle	Case histories of attempts to remove three small ice jams	331

DISCUSSIONS

S. Beltaos	Fracture and breakup of river ice cover	
Discussion by M. N. Demuth and T. D. Prowse		336
Author's reply		336
Discussion by Steven F. Daly		337
Author's reply		338

BOOK REVIEWS / CRITIQUES DE LIVRES

R. Kerry Rowe	Geotechnology of waste management. By I. S. Oweis and R. P. Khara	340
W. A. McLaughlin	Project management — a reference for professionals. Edited by Robert L. Kimmons and James H. Loweree	340

JUNE/JUIN

ARTICLES

Patrick Paultre and Denis Mitchell	Assessment of some Canadian seismic code requirements for concrete frame structures	343
James A. Kells and C. D. Smith	Reduction of cavitation on spillways by induced air entrainment	358
Murray C. Temple, Chun-Wah (Bernard) Loong, and Gerard R. Monforton	Uplift resistance of interior footings of low-rise buildings	378
J. J. Sharp	Marine outfalls for small coastal communities in Atlantic Canada	388
Karolj K. Reznicek, Slobodan P. Simonovic, and C. R. Bector	Optimization of short-term operation of a single multipurpose reservoir — a goal programming approach	397
J. A. Stewart and M. Van Aerde	Material selection and mix design considerations for constructing asphaltic roads and runways in Canada's north	407
Malik Ranasinghe and Alan D. Russell	Economic risk analysis of large engineering projects	416
M. Sargious and N. Mushule	Behaviour of recycled asphalt pavements at low temperatures	428
J. T. Harrison, T. Viraraghavan, and H. Sommerstad	Treatment of slaughterhouse effluent using an anaerobic filter	436
N. C. Lind, J. S. Nathwani, and E. Siddall	Management of risk in the public interest	446
Ian J. Jordaan and Marc A. Maes	Rationale for load specifications and load factors in the new CSA code for fixed off-shore structures	454
Otto J. Svec and A. O. Abd El Halim	Field verification of a new asphalt compactor, AMIR	465
John N. Jackson	The construction and operation of the First, Second, and Third Welland canals	472
Osama Moselhi, Charles Leonard, and Paul Fazio	Impact of change orders on construction productivity	484
K. M. Sakr and M. U. Hosain	Applications of expert system building tools in structural design	493
K. C. Lin and M. E. J. Pearce	Effects of mixing on anaerobic treatment of potato-processing wastewater	504
W. M. Abdelwahab and M. A. Sargious	A simultaneous decision-making approach to model the demand for freight transportation	515
Michael J. Newark	A design basis tornado	521
E. L. Jones and J. W. Atwater	Survey of household hazardous waste generation and collection preferences in the City of Vancouver	525

BOOK REVIEWS / CRITIQUES DE LIVRES

K. W. Neale	Dynamic fracture mechanics. By L. B. Freund	535
A. P. S. Selvadurai	Boundary element method in elastodynamics. By G. D. Manolis and D. E. Beskos	535

AUGUST/AOÛT

ARTICLES

Diana E. Chernenko and D. J. Laurie Kennedy An analysis of the performance of welded wide flange columns	537
G. W. Heinke, D. W. Smith, and G. R. Finch Guidelines for the planning and design of wastewater lagoon systems in cold climates	556
W. K. Tso and N. Naumoski Period-dependent seismic force reduction factors for short-period structures	568
Daniel Vézina, Denis Beaupré, et Michel Pigeon Influence de l'âge au démoulage et du type de moule sur la résistance à l'écaillage de bétons contenant de la fumée de silice	575
Michel Pigeon et Marcel Langlois Étude de la résistance au gel de bétons contenant un fluidifiant	581
Michel Massiéra Utilisation des parois moulées en béton comme rideaux d'étanchéité des fondations de barrages en terre et en enrochement	590
Kaz Adamowski and W. Feluch Application of nonparametric regression to groundwater level prediction	600
M. A. Erki Modelling the load-slip behaviour of timber joints with mechanical fasteners	607
Kenneth C. Johns A continuous design formula for timber columns	617
Michael C. Quick Reliability of flood discharge estimates	624
P. G. Glockner Test results on the effects of weathering on plastic coverings	631
Borg Madsen and M. Tomoi Size effects occurring in defect-free spruce-pine-fir bending specimens	637
M. Lachance, B. Bobée, and G. de Marsily Multivariate analysis of the water quality of a set of Quebec lakes: finding watershed explicative factors of the acidification process	644
M. F. Dahab, H. L. Becker, and T. E. Riley Treatment of a wood products Superfund wastewater: a case study	654
Hamed Assaf and Michael C. Quick Updating hydrological model forecasts	663
Robert E. Loov and Lloyd E. Rodway Determining the elevation, slope, and waviness of surfaces using the procedures of CAN/CSA-A23.1-M90 Appendix E	675
C. James Martel and Carl J. Diener Pilot-scale studies of sludge dewatering in a freezing bed	681
Hany Ahmed El-Ghazaly and Heyad Saud Al-Zamel An innovative detail for precast concrete beam-column moment connections	690
Denis Mitchell, René Tinawi, and Robert G. Sexsmith Performance of bridges in the 1989 Loma Prieta earthquake—lessons for Canadian designers	711

DISCUSSIONS

M. Fafard, A. Picard, and D. Beaulieu Analyse des structures avec joints à rigidité partielle : une approche unifiée	735
Discussion by A. Ghali	736
Authors' reply	736

BOOK REVIEWS / CRITIQUES DE LIVRES

Bruno Massicotte Béton armé : calcul aux états limites — théorie et pratique. <i>Édité par</i> Aram Samikian	737
M. A. Erki Dimensionnement des structures en béton. <i>Par</i> René Walther et Manfred Miehlebradt	738

OCTOBER/OCTOBRE

ARTICLES

V. V. Neis, S. Ghosh, and M. Hatzinikolas Strength tests on slender plain block masonry walls with veneer wythes	739
A. Filiatrault and R. O. Foschi Static and dynamic tests of timber shear walls fastened with nails and wood adhesive	749
M. A. Blaisdell, I. K. Tsanis, and Y. Krestenitis Modelling the steady-state circulation in a distorted physical model of the Windermere Basin	756
Antoine E. Lahoud Slenderness effects in high-strength concrete columns	765
B. Morse, R. D. Townsend, and M. Sydor Mathematical modelling of riverbed dynamics — a Canadian case study	772
Daryl Attwood, Maher A. Nessim, Abdel Ghoneim, Andre Corneau, and Moe S. Cheung Application of reliability theory to in-service monitoring and maintenance of parking garages	781
M. S. Cheung and A. Megnounit Parametric study of design variations on the vibration modes of box girder bridges	789
David L. Woytowich, Martin W. King, Myron G. Britton, and Jan A. Oleszkiewicz Accelerated testing of a filled polyester E-glass composite in acidic environments	799
John Christian and George Kallouris An expert system for predicting the cost-time profiles of building activities	810
Karl Van Dalen and Mark Van Dalen An experimental study of end plate shear connections	818
J. H. P. Quenneville and K. Van Dalen The enhanced performance of split-ring connections through prestressing	830

R. G. Redwood and V. S. Channagiri	Earthquake resistant design of concentrically braced steel frames	839
Y. Ouellet et A. Drouin	Définition des conditions de vagues pour la conception d'un havre de pêche à Sept-Îles	851
Saad Bennis et Jean-Claude Rassam	Utilisation d'un modèle ARMAX pour la prévision du débit à Carillon	864

NOTES

Robert P. Chapuis and Gilles Wendling	Monitoring wells: measurement of permeability with minimal modification of groundwater	871
Robert P. Chapuis, Abdel Keilani, and Germain Cardinal	Pumping more than 100 m ³ /min from excavations for open-air amphitheatres in the city of Québec	875
R. Balachandar, Silvana Sorbo, and A. S. Ramamurthy	A note on circular sharp-crested weirs	881
J. A. Bickley, J. Ryell, C. Rogers, and R. D. Hooten	Some characteristics of high-strength structural concrete	885

DISCUSSIONS

J. William Kamphuis	Improving shore protection design	890
Discussion by David H. Willis		891
Author's reply		891

BOOK REVIEW / CRITIQUE DE LIVRE

Michael Isaacson	Loose boundary hydraulics. By A. J. Raudkivi	892
